

Kundli + Modern Dating + Trust

"Dil se dhundho, Sitaron ki madad se"

Document Type	Complete App Strategy & Build Report
Version	1.0 — June 2026
Prepared for	Founder / Product Owner
Status	Confidential — Internal Use Only

Table of Contents

1. App Concept — Full Summary
2. Market Opportunity & Numbers
3. Unique Selling Points (USP)
4. App Features — Complete List
5. Monetization Strategy
6. User Retention Strategy
7. Build Karo — Zero Budget Platforms
8. Play Store & iOS — Upload Guide
9. AI Prompts — Professional App Builder Prompts
10. Roadmap — Phase by Phase
11. Areas Still to Cover

1. App Concept — Full Summary

CosmicBond ek aise dating aur life-partner platform ka concept hai jo teen dimensions ko ek saath combine karta hai: Modern Dating (casual se serious), Vedic Astrology / Kundli Matching, aur Psychology-based Compatibility. Ye app un young Indians (18-35) ke liye design kiya gaya hai jo astrology mein believe karte hain, lekin purane BharatMatrimony-style forced matching se nahi chahte — woh chahte hain ki UNKA control ho.

3-Layer Matching System:

Layer	Kya Hai	Benefit
■ Kundli Layer	Guna Milan, Manglik, Dasha	Family acceptance, cultural trust
■ Psychology Layer	MBTI / Attachment Style quiz	Real-life compatibility
■ Lifestyle Layer	Goals, religion, family expectations	Long-term match quality

2. Market Opportunity & Numbers

Market Segment	2024 Value	2030 Projection	CAGR
India Dating + Matrimonial	\$1-1.5 Billion	\$3+ Billion	~15%
India Astrology App Market	\$163 Million	\$1.8 Billion	49%
Astrology Dating Apps (Global)	\$3 Billion	\$9 Billion	20%+
AstroTalk Revenue (FY25)	Rs.1176 Crore	—	81% YoY

Key Insight: 18-35 age group astrology engagement ka 65% represent karta hai — aur yahi tera primary target audience hai. Tier-2/Tier-3 cities mein crores of users hain jo English-only apps se frustrated hain. Yahan koi bada player seriously nahi gaya abhi tak.

3. Unique Selling Points (USP)

Feature	Tinder/Bumble	Shaadi.com	AstroTalk	CosmicBond
Dating Focus	Yes	No	No	Yes
Marriage Focus	No	Yes	No	Yes
Deep Kundli Match	No	Basic	Yes	Yes (Deep)
Psychology Test	No	No	No	Yes
Verified Profiles	Partial	Partial	No	Yes (Strong)
Gen Z Modern UI	Yes	No	No	Yes
Regional Languages	No	Partial	Yes	Yes
Post-Match Features	No	No	No	Yes (Unique)
Couple Mode	No	No	No	Yes (Unique)
Shareable Cosmic Card	No	No	No	Yes (Unique)

4. App Features — Complete List

Onboarding & Profile

- Date of Birth, Birth Time, Birth Place (for Kundli)
- Aadhaar-based silent verification (badge only, no data shown)
- Video selfie at signup (AI real-person check)
- Intent Badge: Dating / Serious Relationship / Not Sure
- MBTI / Attachment Style quiz (5 min max)
- Lifestyle questionnaire: religion, family expectations, goals

Matching Engine

- 3-Layer Compatibility Score (Kundli + Psychology + Lifestyle)
- Manglik / Dasha compatibility check
- Daily 10 free likes (premium = unlimited)
- Smart filters: location, age, religion, intent
- Mutual interest reveal (both like = match unlocked)

Communication

- In-app chat (no need to share Insta/WhatsApp)
- In-app video calling
- In-app photo sharing
- Icebreaker questions powered by compatibility score
- Chat milestone badges ('Talked 7 days', 'First video call')

Unique Features (No Competitor Has These)

- Shareable 'Cosmic Compatibility Card' — viral Instagram content
- Daily 'Stars say...' micro-content for your match
- Couple Mode — unlocks after mutual interest confirmation
- Date ideas based on planetary mood (fun, engaging)
- Live Astrologer consultation (pay-per-session)

Post-Match / Relationship Journey

- Relationship milestone tracker
- Couple deep compatibility report (paid)
- Shaadi Muhurat finder (pre-marriage)
- Family kundli matching (for parents, paid)
- Annual couple horoscope subscription
- Anniversary / special date reminders

Community

- Match Success Stories (user-submitted, verified)
- Astrology discussion forums
- Daily horoscope feed
- Regional content in Hindi, Tamil, Telugu, Bengali

5. Monetization Strategy

Model: Freemium + Subscription + Pay-Per-Use (Hybrid)

Tier	Features Included	Price
FREE	Profile, Basic matches, Basic kundli score, 10 likes/day	Rs. 0
PREMIUM (Monthly)	Unlimited likes, Who liked you, Detailed kundli report, Psychology breakdown, 1 profile boost/week	Rs. 199/month
PREMIUM (Yearly)	All monthly features + priority support + 2x boosts	Rs. 1499/year
PAY-PER-USE	Live Astrologer session Deep compatibility report (one match) Family kundli matching Shaadi Muhurat report	Rs. 50-200 Rs. 49 Rs. 299 Rs. 499
COUPLE MODE	Relationship milestone features, date ideas, annual horoscope	Rs. 99/month

Revenue Principle: Kabhi bhi sirf ads pe mat jao — dating app mein ads = user experience barbaad = app delete. Revenue model user ke TRUST pe based hona chahiye.

6. User Retention Strategy

Dating apps ki sabse badi problem: user match milne ke baad app delete kar deta hai. CosmicBond ka solution — match milna END nahi, naye chapter ka START hai.

Stage	User Action	App Value Provided	Revenue
Single	Partner dhundh raha hai	Matching + Kundli score	Subscription
New Match	Baat kar rahe hain	In-app chat/call, icebreakers	Subscription
Dating	Milne lage hain	Date ideas, Cosmic Card, milestones	Couple Mode
Serious	Relationship mein hain	Deep report, Muhurat finder	Paid Reports
Pre-Marriage	Shaadi ki planning	Family kundli, Muhurat	High Ticket
Married	App use kyon karein?	Anniversary alerts, couple horoscope	Annual Sub

Key Insight: Ek user = multiple years ka revenue. Yahi 'Lifetime Value (LTV)' hai jo ek long-term profitable company banata hai.

7. Build Karo — Zero Budget Platforms

Teri situation: No money. Toh coding-free ya low-cost platforms best option hain MVP (Minimum Viable Product) banane ke liye. Yahan top platforms hain:

Platform	Type	Free Plan?	Best For	Dating App Support
FlutterFlow flutterflow.io	Visual Code Builder (Flutter)	Yes (limited)	Full app with backend, DB, auth	Strong — profiles, chat, matching
Bubble bubble.io	No-Code	Yes	Web app first, then mobile wrapper	Very strong — best for MVP
Glide glideapps.com	No-Code (Google Sheets base)	Yes	Simple MVP, quick launch	Basic matching
Adalo adalo.com	No-Code Mobile	Yes (limited)	Native mobile Android + iOS	Good for dating features
Thunkable thunkable.com	No-Code Mobile	Yes	Android + iOS apps	Moderate
Supabase supabase.com	Backend/Database	Yes (generous)	Database + Auth + APIs	Essential backend for any platform

Recommended Stack (Zero Budget):

Component	Tool	Cost
Frontend / App UI	FlutterFlow or Adalo	Free tier
Backend / Database	Supabase	Free (500MB DB)
Authentication	Supabase Auth	Free
Kundli Calculation API	Astro API (RapidAPI)	Free tier available
Chat Feature	Stream Chat SDK	Free up to 5M messages
Push Notifications	OneSignal	Free
Hosting (web)	Vercel or Netlify	Free
Analytics	Mixpanel / Firebase	Free
Payments (India)	Razorpay	Free setup, % per transaction

8. Play Store & iOS — Upload Guide

8A. Google Play Store

Step	Kya Karna Hai	Cost / Time
1	play.google.com/console par account banao	Rs. 1,750 one-time fee
2	App APK/AAB file build karo (FlutterFlow se export)	Free
3	App content rating fill karo (PEGI/IARC)	Free, 10 min
4	Store listing: screenshots, description, icon	Free, 1-2 hrs
5	Privacy Policy URL add karo (GitHub page pe host karo)	Free
6	Testing track: Internal > Closed > Open Beta	Free
7	Production mein submit karo — review 3-7 days	Free

Dating apps ke liye Play Store mein 'Sensitive Content' policy follow karni hogi — explicit content allow nahi hai. Real name ya real photo verification mention karo listing mein.

8B. Apple App Store (iOS)

Step	Kya Karna Hai	Cost / Time
1	developer.apple.com par enroll karo	\$99/year (Rs. ~8,200)
2	Mac ya FlutterFlow cloud build se IPA file banao	Free (FlutterFlow cloud build)
3	App Store Connect mein app create karo	Free
4	Screenshots, icon, description add karo	Free, 1-2 hrs
5	TestFlight pe beta test karo (friends ke liye)	Free
6	Submit for review — Apple review 24-48 hrs	Free
7	Dating apps ke liye age gate 17+ set karo	Required

Budget Tip: Pehle sirf Android (Play Store) launch karo — Rs. 1,750 mein. iOS baad mein jab kuch revenue aaye. India mein Android users 95%+ hain.

9. AI Prompts — Professional App Builder Prompts

Ye prompts tu AI tools (Claude, ChatGPT, Cursor, v0.dev) mein use kar sakta hai apne app ke alag alag parts build karne ke liye. Copy-paste karo, directly kaam karega.

Prompt 1: Complete App Blueprint

You are a senior product manager and mobile app architect. Design a complete product specification for a dating and matchmaking app called CosmicBond for the Indian market. The app combines three layers: (1) Vedic Astrology / Kundli compatibility matching using traditional Guna Milan system, (2) Psychology-based compatibility using MBTI and attachment styles, (3) Lifestyle compatibility based on religion, family expectations, and life goals.

Target audience: Indian users aged 18-35, Tier-1 and Tier-2 cities, who believe in astrology but want modern dating UI. The app should have: user onboarding with birth details collection, intent badge system (dating/serious/unsure), Aadhaar silent verification badge, 3-layer compatibility score display, in-app chat and video, shareable Cosmic Compatibility Card for Instagram, post-match Couple Mode with relationship journey features, and a pay-per-session astrologer marketplace.

Provide: complete feature list, user flow diagrams in text, data model structure, and API requirements. Format as a detailed PRD (Product Requirements Document).

Prompt 2: UI/UX Design System (for v0 dev or Figma AI)

Design a modern, Gen Z-friendly mobile app UI for a dating app called CosmicBond that combines astrology with modern dating. The color palette should use deep purple (#6B21A8), gold (#D97706), and dark navy (#1E1B4B) as primary colors with soft gradients. Style reference: modern, cosmic, premium – think Headspace meets Bumble.

Design these 5 screens:

1. Onboarding screen with birth details input and intent badge selection
2. Home/Discover screen showing match cards with Cosmic Compatibility Score (0-100) breakdown showing Kundli/Psychology/Lifestyle percentages
3. Match profile screen with shareable Cosmic Card design
4. In-app chat screen with milestone badges
5. Couple Mode dashboard showing relationship journey stages

Use React with Tailwind CSS. Make it fully responsive for mobile (375px width). Add smooth animations for card interactions.

Prompt 3: Kundli Matching Backend Logic

You are a Vedic astrology software engineer. Build a JavaScript/Python function that calculates Kundli compatibility (Guna Milan / Ashtakoota system) between two people given their: date of birth, time of birth, and place of birth.

The function must calculate all 8 aspects:

Varna Milan (1 point), Vasya Milan (2 points), Tara Milan (3 points), Yoni Milan (4 points), Grah Maitri (5 points), Gana Milan (6 points), Bhakoot Milan (7 points), Nadi Milan (8 points) – Total: 36 points.

Return: total score, individual scores, compatibility percentage, Manglik dosha status, and a human-readable compatibility message in both English and Hindi. Include error handling for missing birth time.

Prompt 4: Database Schema Design

Design a complete PostgreSQL database schema for a dating app called CosmicBond. Include tables for: users (with birth details, intent, verification status), kundli_data (calculated astrological data per user), compatibility_scores (cached scores between user pairs, 3-layer), matches (match status, timestamps), messages (chat with read receipts), couple_mode (relationship stage tracking), astrologer_sessions (bookings, payments), subscriptions (plan, expiry, features), reports (kundli reports purchased).

Add proper indexes for performance, foreign keys, and timestamps. Also provide the Supabase Row Level Security (RLS) policies for user data privacy. Follow GDPR/India DPDP Act 2023 data minimization principles.

Prompt 5: Marketing & Growth Strategy

You are a growth hacker specializing in Indian consumer apps. Create a complete 0-to-10,000 user acquisition strategy for CosmicBond, an astrology-based dating app targeting Indian users aged 18-35 with zero marketing budget.

Include: Instagram Reels content strategy using Cosmic Compatibility Card viral mechanic, college campus ambassador program, influencer outreach strategy for astrology creators on YouTube/Instagram, referral program design, App Store Optimization (ASO) keyword strategy for India, and a 90-day launch calendar.

Provide specific content ideas, hashtag strategies, and partnership targets. All content should work in both English and Hindi.

10. Roadmap — Phase by Phase

Phase	Timeline	Goals	Key Milestones
Phase 1 MVP	Month 1-3	Basic app on Adalo/FlutterFlow Kundli score + profiles In-app chat	50-100 beta users Agra/Lucknow pilot Play Store launch
Phase 2 Verification	Month 4-6	Aadhaar verification badge Psychology quiz Premium subscription	500+ active users First paid subscribers Positive reviews
Phase 3 Growth	Month 7-12	Tier-2 cities expansion Regional languages Couple Mode launch	5,000+ users Rs. 50K+/month revenue Instagram viral cards
Phase 4 Scale	Year 2	Astrologer marketplace Match Stories Pan-India launch	50,000+ users Series A funding target Media coverage
Phase 5 Dominate	Year 3+	iOS launch AI-powered matching B2B (matrimony agencies)	1 Lakh+ users Profitable Market leader niche

11. Areas Still to Cover

Ye report mein hamne app concept se lekar build strategy tak sab cover kiya. Lekin ek complete product ke liye ye areas abhi bhi baaki hain — future sessions mein inhe ek ek karke tackle karo:

■ Legal & Compliance

- India DPDP Act 2023 (Digital Personal Data Protection) — teri app ke liye kya rules apply hote hain
- Privacy Policy aur Terms of Service kaise likhein (free template sources)
- Dating apps ke liye age verification legal requirements
- Aadhaar integration ke legal limits (UIDAI rules)

■ Funding & Finance

- Zero budget se shuru karke funding kab aur kahan se leni chahiye
- Indian startup grants — Startup India scheme, DEI incubator programs
- Razorpay / Cashfree payment gateway integration guide
- Accounting aur tax basics for app revenue

■ Branding & Design

- App name finalization + domain booking (.in domain = Rs. 500/year)
- Logo aur brand identity design (Canva ya AI tools se free)
- App icon design guidelines for Play Store
- Color psychology for Indian dating app audience

■ Marketing Deep Dive

- Instagram Reels strategy for Cosmic Compatibility Card viral mechanic
- College ambassador program — DEI Agra se shuru karo (tera network)
- Astrology influencer outreach list (YouTube/Instagram)
- App Store Optimization (ASO) — keywords, screenshots, description

■ Technical Deep Dive

- Vedic astrology API options (RapidAPI, AstroAPI.com) — comparison
- Real-time chat implementation (Stream SDK vs Firebase)
- AI matching algorithm — how to improve over time with user data
- Video calling integration (Agora vs Daily.co — both have free tiers)

■ Safety & Trust

- How to handle harassment/abuse reports
- Photo AI moderation (AWS Rekognition — free tier)
- Block/report system design
- Safe dating guidelines — in-app tips for users

■ Analytics & Growth

- Key metrics to track: DAU, MAU, Match rate, Conversion to premium
- A/B testing strategy for onboarding
- Cohort analysis — understanding which users stay and which leave
- Competitor monitoring strategy

Next Step Recommendation: Sabse pehle Platform choose karo (FlutterFlow ya Bubble), Supabase backend setup karo, aur Kundli API test karo. Ye teen cheezein karne ke baad tera MVP 70% ready hoga. Phir beta users ke liye apne college network se start karo!

Report prepared with CosmicBond App Strategy Session | June 2026 | Confidential
